

**Vassilis Andronis** is a Rural and Surveying Engineer from the National Technical University of Athens (NTUA), Greece, where he is currently working toward the Ph.D. degree in hyperspectral remote sensing. Is a permanent staff of the Remote Sensing Laboratory of NTUA since 1993. He has significant expertise in the fields of photo-interpretation, remote sensing, digital image processing and their applications. He has worked in many research programs and has long experience in many operating systems as well as relevant programming skills, in many languages (R, idl, matlab, python, fortran, html). He also has long experience in remote sensing and geographical information system software (envi, erdas, pci geomatica, orfeo toolbox, atcor, esa snap, er mapper, idrisi, ecognition, qgis, grass, arcgis, saga). He is the author/coauthor of more than twenty publications in scientific journals and in proceedings of conferences and workshops until 2020.
