

Charis J. GANTES, Ph.D.

Professor of Structural Engineering

Institute of Steel Structures - Department of Structural Engineering - School of Civil Engineering
National Technical University of Athens

9 Heroon Polytechniou Street, GR-157 80, Zografou Campus, Athens, Greece

tel. + 30 210 7723440 - telefax + 30 210 7723442

E-mail: chgantes@central.ntua.gr, chgantes@alum.mit.eduWeb: <http://users.civil.ntua.gr/chgantes/en/> - LinkedIn: www.linkedin.com/in/CharisGantes**SUMMARY OF ACTIVITIES IN DEPLOYABLE STRUCTURES****MASTER'S THESIS AND PHD DISSERTATION**

- Gantes, C., “A Design Methodology for Deployable Structures”, Thesis submitted to the Department of Civil Engineering at the Massachusetts Institute of Technology on May 3, 1991, in partial fulfillment of the requirements for the degree of Doctor of Philosophy in Structural Engineering, available as Research Report No. R91-11 of the Civil Engineering Department, MIT, Cambridge, Massachusetts 02139.

<http://hdl.handle.net/1721.1/13901>

- Gantes, C., “New Concepts and Preliminary Design Procedures for Flat Deployable Structures”, Thesis submitted to the Department of Civil Engineering at the Massachusetts Institute of Technology on August 5, 1988, in partial fulfillment of the requirements for the degree of Master of Science in Civil Engineering, available as Research Report No. R88-13 of the Civil Engineering Department, MIT, Cambridge, Massachusetts 02139.

BOOK

- Gantes, C.J., “Deployable Structures - Analysis and Design”, WIT Press, Southampton, England, 2001.

<http://www.witpress.com/978-1-85312-660-4.html>

BOOK CHAPTERS

- Gantes, C.J., “Deployable Structures”, *Fifty Years of Progress for Shell and Spatial Structures: 50th Jubilee of the IASS*, edited by I. Mungan and J.F. Abel, pp. 373-390, 2011.

<https://iass-structures.org/page-18386>

- Gantes, C.J., “Nonlinear Structural Behavior, Analysis and Design of Deployable Structures”, *NATO Science Series, Series III: Computer and Systems Sciences, Vol. 179, Computational Aspects of Nonlinear Structural Systems with Large Rigid Body Motion*, edited by J. Ambrosio and M. Kleiber, IOS Press, pp. 215-235, 2001.
