

Publication Year	Document Title	Total 202
2018	Rethinking new public infrastructure value for money in recession times: the Greek case	0
2016	A computer-aided conceptual cost estimating system for pre- stressed concrete road bridges	0
2015	Non-parametric bill-of-quantities estimation of concrete road bridges' superstructure: An artificial neural networks approach	1
2015	Preliminary Cost Estimate Model for Culverts	2
2014	Earthmoving trucks condition level prediction using neural networks	3
2013	Algorithmic method for scraper load-time optimization	2
2012	Early cost estimating of road tunnel construction using neural networks	25
2012	Investigation of earthmoving trucks deterioration using discriminant analysis	2
2011	Parametric model for conceptual cost estimation of concrete bridge Foundations	11
2010	Road tunnels construction cost estimation: A structural equation model development and comparison	8
2007	Linear versus network scheduling: A critical path comparison	16
2007	Fund allocation for transportation network recovery following natural disasters	38
2007	The use of time and cost utility for construction contract award under European Union Legislation	41
2006	Bridge health monitoring for egnatia Odos Bridge Management System	1
2006	A methodology and decision support system for scheduling inspections in a bridge network following a natural disaster	2
2006	Development of a bridge management system for a freeway authority in Greece	0
2005	A Web-Supported National Bridge Inventory Management Tool	4
2004	Critical path determination by incorporating minimum and maximum time and distance constraints into linear scheduling	26
2004	Discussion of "comparison of linear scheduling model and repetitive scheduling method" by Kris G. Mattila and Amy Park	6
2001	Managing geotechnics in a mega-project: The Egnatia Motorway case in Greece	0
1996	SEMANTIC: Smart Earthmoving Analysis and Estimation of Cost	13
1989	Toll booth management via simulation	1
